Welcome Week 2018
Micro-Seminars

Neuroscience of Creativity and Social Interaction

Lisa Aziz-Zadeh
Occupational Science and Occupational Therapy
Independent Health Professions

In this seminar, we will review:
DAY 1
1. How creativity is processed by the brain
2. How creativity can be nurtured, given the science of creativity
3. Strategies to improve creativity

DAY 2
1. The neuroscience of social interaction, understanding others, and empathy
2. How these brain processes are altered when we try to understand people who are similar to us as compared to different from us
3. Outstanding questions and current areas of research in the neuroscience of social cognition
